### Assurance opinion

Based on the results of our verification process, Carbon Footprint Ltd provides limited assurance of the GHG emissions statement, **and found no evidence that the GHG emissions statement:**

- is not materially correct and is not a fair representation of the GHG emissions data and information;

- has not been prepared in accordance with the GHG Protocol, ISO14064-3 standard, DEFRA reporting guidelines.

It is our opinion that Elbit Systems has established appropriate systems for the collection, aggregation and analysis of quantitative data for determination of GHG emissions for the stated period and boundaries.
