

Uni-Modular Artillery Charge System (UMACS), M662 - 155mm

- One type of module complies with STANAG and JBMOU Standards
- M662 can be fired from any 155mm gun firing systems (39, 45, 52 cal.)
- Adjusted to FALCS (Full Automatic Load Charge System)
- Operational simplicity and safety - uniform, identical and symmetrical modules
- Maximum operational flexibility
- Simplicity in tactical firing
- Increased firing rate
- Cost effective - saving operational and logistical costs
- **Maximum modularity**
- **A unique innovation solution**
- **State of the art Uni-Modular Charge System**
- **Comply with JBMOU requirements**

Uni-Modular Artillery Charge System (UMACS), M662 - 155mm

Key Benefits

- Combat proven
- Off-the-shelf
- Unique ignition system
- Low ignition delay time
- Low chamber and negative differential pressures
- One type of MACS in logistics chain (FIFO)

Module characteristics

Diameter	154mm
Length	155mm
Charge weight	2.5kg
Propellant weight	2.1kg
NSN	1320-31-018-1552
