

Elbit Systems is committed to excellence and leadership in all business areas in which it operates, including the protection of human and natural resources.

The Company's management is committed to the following environment, health and safety (EHS) management principles:

- ❖ **Comply with applicable legal requirements, customer requirements and standards adopted by the Company.**
- ❖ **Generate a safe and healthy work environment for employees and others working at our facilities in routine and emergency situations, and prevent accidents and occupational illness by identifying and evaluating hazards, and reducing them (in compliance with ISO 45001).**
- ❖ **Preserve environmental resources, reduce ecological footprints and prevent environmental pollution, throughout the product lifecycle.**
- ❖ **Incorporate EHS issues into the Company's business processes, such as supply chain and mergers and acquisitions, and set proactive goals and plans for continuous improvement in performance and management practices.**
- ❖ **Train and deploy EHS best practices across all organizational levels, encourage employees and managers to report hazards, potentially hazardous situations, accidents and near-miss incidents.**
- ❖ **Maintain open and transparent communication channels between the Company and external stakeholders, as well as information sharing and consultation processes with employees on EHS issues.**

* EHS - Environment, Occupational Health and Safety
