

M482

155mm HE-ER-BB Artillery Projectile

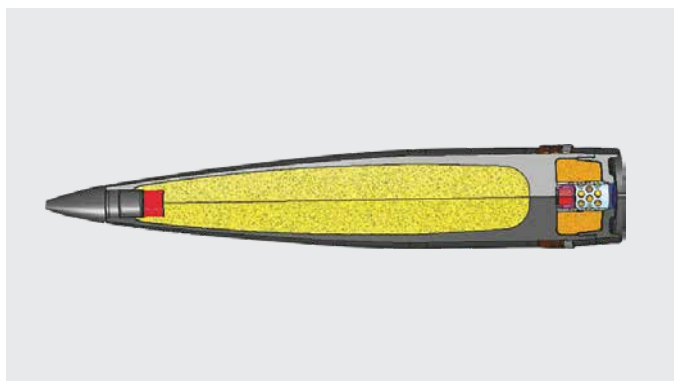

The M482 is a High-Explosive, Extended-Range, Base-Bleed projectile with lethality that exceeds similar HE projectiles. The M482 is compatible with all NATO 39, 45, 52 caliber 155mm artillery guns, using all types of propelling charges. Containing 8.5kg of advanced explosive or TNT, the projectile can be fired to 40km from a 52 cal. gun.

M482

155mm HE-ER-BB Artillery Projectile

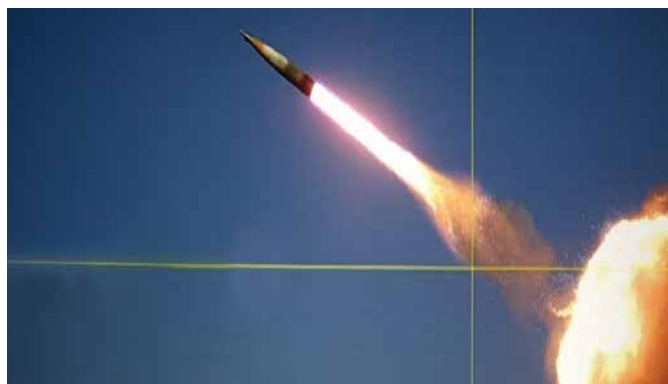

Technical Data

- Total Length: 900mm
- Total Weight: 45.5kg
- Explosive Weight: 8.5kg
- Fuze Type: P.D. or Proximity

Operational Capabilities

Barrel	Muzzle Velocity (m/s)	Max. Range (km)	Precision
39 caliber	840	32	PEr<0.3% (range up to 30km)
45 caliber	910	36	PEr<0.55% (range up to 30km)
52 caliber	948	40
