

# M920

## Electronic PD Fuze for Artillery Ammunition

The M920 electronic PD fuze is used with 155mm artillery HE projectiles. The advanced, highly reliable fuze activates upon impact with the target or on the ground (Point Detonation). The fuze design is based on STANAG 4187, 4157 and complies with MIL-STD 1316, MIL-STD 331.

# M920

## Electronic PD Fuze for Artillery Ammunition

### Dimensions

Interface and contour are MIL-STD 333 compliant.

Nominal Dimensions	
Fuze Thread Size	2"-12UN-1A
Fuze Intrusion	38mm
Nominal Length	133mm
Max. Diameter	61.34mm
Weight	
M920 Fuze	704g ± 20g
Operating Temperature	
Firing	<ul style="list-style-type: none"><li>• Lower firing temperature: = -32°C</li><li>• Upper firing temperature: = +63°C</li></ul>
Storage	<ul style="list-style-type: none"><li>• Lower storage temperature: = -46°C</li><li>• Upper storage temperature: = +70°C</li></ul>
