

# M662

## Uni-Modular Artillery Charge System (UMACS) for 155mm Howitzer Guns

- One type of module complies with STANAG and JBMOU Standards
- M662 can be fired from any 155mm gun firing systems (39, 45, 52 cal.)
- Adjusted to FALCS (Full Automatic Load Charge System)
- Operational simplicity and safety - uniform, identical and symmetrical modules
- Enhanced operational flexibility
- Simplicity in tactical firing
- Increased firing rate
- Cost-effective - saving operational and logistical costs
- **Enhanced modularity**
- **An innovative solution**
- **State-of-the-art Uni-Modular Charge System**
- **Comply with JBMOU requirements**
- **NSN – 1320-31-018-1552**

**Elbit Systems™**

# M662

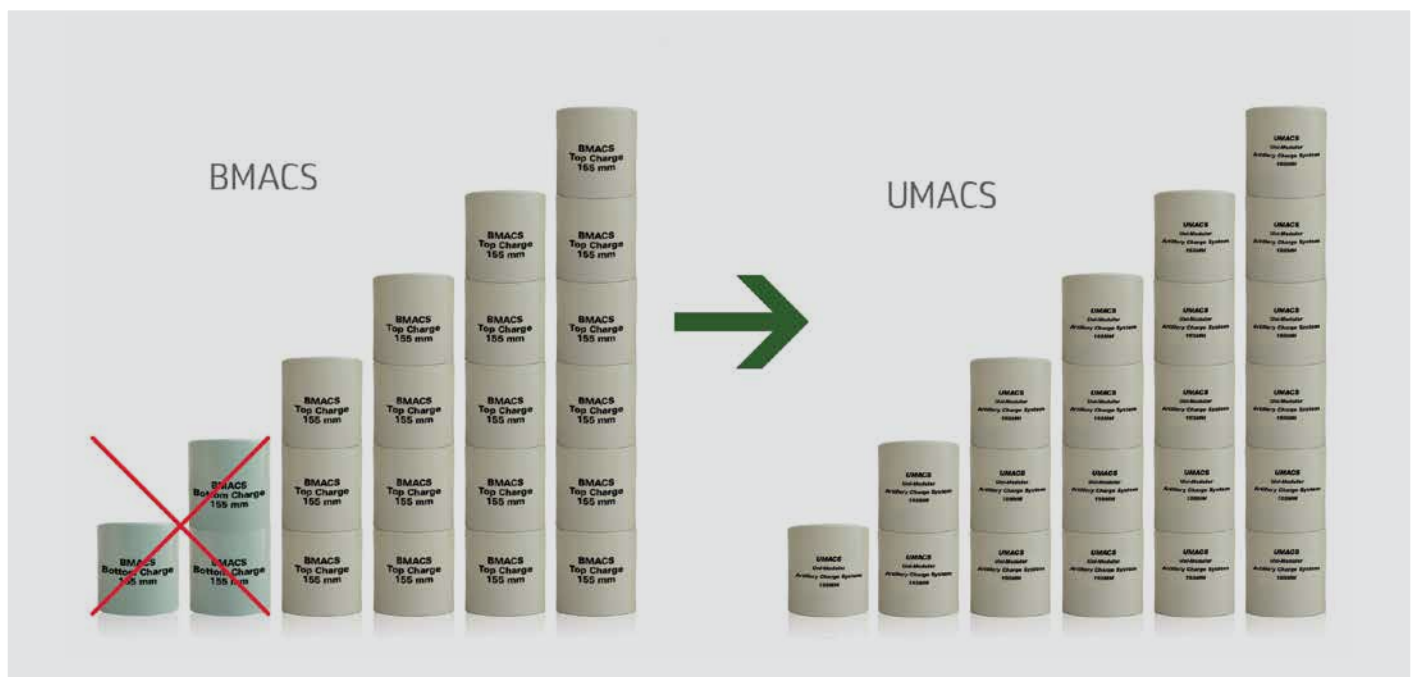

## Uni-Modular Artillery Charge System (UMACS) for 155mm Howitzer Guns

### Key Benefits

- Combat proven
  - Off-the-shelf
  - Unique ignition system - short ignition delay time
  - Low chamber and negative differential pressures
- One type of MACS in logistics chain (FIFO)

### Technical Data

- Diameter: 154mm
- Length: 155mm
- Module: 2.5kg
- Propellant weight: 2.1kg
- NSN: 1320-31-018-1552
